## Check terminal for oscilloscope

Part No.: LC-3-G, LC-3-S （1000pcs/pack）

- You can put it with a pitch of 2.54 mm.
- The probe for oscilloscope can be hooked from any direction.
- With six types of glass beads color, you can classify the signal lines by using different colors.
- Material: Phosphor bronze: φ 0.3
- Finish: LC-3-G: Gold plating over nickel base
  　　　 LC-3-S: Tin plating over nickel base
- Printed board fitting hole diameter: φ 0.8
- Operating temperature range: − 40 to + 150℃
- Beads color type: BLACK, GREENISH BROWN, GREEN, SKY BLUE, PURPLE, WHITE
- How to order: LC-3-G BLACK
  └ Color designation

Check terminal for oscilloscope

Part No.: LC-33-G, LC-33-S （1000pcs/pack）

- Material: Metal part: Phosphor bronze, φ 0.3
  　　　　 Resin part: Fluorine (UL94V-0)
- Finish: LC-33-G: Gold plating over nickel base
  　　　 LC-33-S: Tin plating over nickel base
- Printed board fitting hole diameter: φ 0.8
- Operating temperature range: − 40 to + 150℃
- Beads color type: RED, ORANGE, YELLOW, WHITE, BLACK
- How to order: LC-33-G RED
  └ Color designation

Check terminal for φ 0.3

Part No.: LC-4-G, LC-4-S （1000pcs/pack）

- This check terminal is developed for a land with small diameter（φ 0.3 to φ 0.4hole for upper and lower electrical connection）
- Material: Metal part: Phosphor bronze, φ 0.25、
  　　　　 Resin part: Fluorine (UL94V-0)
- Finish: LC-4-G: Gold plating over nickel base
  　　　 LC-4-S: Tin plating over nickel base
- Printed board fitting hole diameter: φ 0.3 to φ 0.4
- Operating temperature range: − 40 to + 150℃
- Beads color type: RED, YELLOW, BLUE, WHITE, BLACK
- How to order: LC-4-G RED
  └ Color designation
