Test point for logic
### ST series （1000pcs/pack）

- Best solution for a logic circuit.
- This terminal can be inserted in a hole of ϕ 0.5、ϕ 0.6、ϕ 0.8、ϕ 1.0 and ϕ 1.2
- This terminal can be fit to a through hole land for upper and lower electrical connection.
- Material: Brass
- Finish: Gold plating over nickel base

Test point for logic   For printed board with a thickness of t3.2
SB series （1000pcs/pack）

- This is a test point to be used for a PC board with a thickness of t3.2
- Material: Brass
- Finish: Gold plating over nickel base
